FOR IMMEDIATE RELEASE

Alexandria International Airport to Celebrate Airport Workers Day *Airport Workers Day Observed in North America on June 25, 2025*

ALEXANDRIA, La. (June 24, 2025) – England Airpark and Alexandria International Airport (AEX) will join other airports across North America in observing Airport Workers Day on Wednesday, June 25, 2025, across social media platforms. This coordinated event underscores the indispensable contributions of airport personnel across all functions, such as passenger services, facility maintenance, and operations.

According to the Airports Council International – North America, “U.S. airports contribute \$115.4B in direct payroll, supporting 1.4 million on-airport workers representing every facet of airport operations and business management.” AEX alone is responsible for more than 2,200 direct and indirect jobs.

“Our AEX team is second to none,” states Director of Aviation and Deputy Director of Alexandria International Airport and England Airpark Scott Gammel. “Passengers often tell us how easy and efficient it is to fly AEX. While that is true, it doesn’t happen by chance. Our team works tirelessly – around the clock and often behind the scenes – to ensure a safe, seamless, and smooth experience for our guests. We thank them for their commitment to safety and customer service.”

Follow England Airpark on social media for Airport Workers Day employee highlights and industry data: @Englandairpark (Facebook and Instagram) and @England-airpark (LinkedIn). Participating organizations will use #AirportWorkersDay2025 to collate content.

About England Airpark

The England Economic and Industrial Development District is an independent political subdivision of the State of Louisiana. England Airpark encompasses approximately 4,000 acres and includes Alexandria International Airport (AEX). As a mixed-use development offering convenient connectivity through air, interstate highway, rail, and port access, the Airpark features more than 300 residential units and 1.5 million square feet of commercial space, supporting aviation, transportation, manufacturing, education, and engineering sectors.
